Introduction

by René Zahnd and Johanna Aebi

Dear friends of YES

The Earth races around the sun at 30 kilometres per second – and over the past school year it truly felt as though we could sense just how fast it is moving. In a world where geopolitical tensions are on the rise and, at the same time, technological innovations are opening new opportunities at breathtaking speed, we are reminded daily of how vital it is to prepare the next generation for this reality.

Despite, or indeed because of, these rapid changes, our programmes remain as relevant as ever. Thanks to them, almost 10,000 pupils now have a better understanding of how business, society and politics interconnect. They gain self-confidence, practise teamwork, embrace debate without hesitation, and learn to solve problems creatively – skills that will significantly strengthen them both in their personal development and in their professional futures. We naturally do not neglect today's most pressing topics: together with our partners, we are working on integrating AI meaningfully into our programmes and equipping young people to use it responsibly. Through these processes, we ourselves also continue to learn a great deal.

Quite literally, we have not stood still this year: in November of last year, we were able to move into our new offices on the JED Campus in Schlieren. Where the Neue Zürcher Zeitung was once printed, we have now settled in well and are greatly enjoying our wonderful office space.

Some things, however, remained the same – which made them no less of a highlight: in Zurich's main station hall, as part of the National Final of our Company Programme, once again some of Switzerland's youngest entrepreneurs – the participants of our Pintolino – took to the big stage. At this year's visit to the Federal Palace, Beat Jans and Maja Riniker expressed their admiration to the participants of Youth debate during a joint reception. And the Swiss delegation brought home several medals from the International Economics Olympiad in Azerbaijan.

None of this would have been possible without our "YES we can" spirit – which was further strengthened this year by numerous new faces on the team. A huge thank you to our motivated team, for whom no challenge is too great. Of course, their work would be unthinkable without our valued partners, dedicated volunteers, teachers, board members, YES alumni, and all the friends connected with YES – our heartfelt thanks to all of you for your support during the past school year.

The future is uncertain, but one thing is clear: with young people who are learning to take responsibility, to engage in dialogue, to recognise opportunities and to have the courage to try new things, we face it with confidence.

YES, here's to the future!

René Zahnd President YFS Johanna Aebi

YES...

builds **bridges** between education and business and is the leading provider of practical, hands-on economic and civic education programmes for schools in Switzerland.

Pupils develop an understanding of societal interconnections, form their own opinions, learn about the economy, and discover and develop their potential.

Meet the YES team

Facts & Figures

Our Programmes

What we offer

Our Community

Primary School

Primary school children discover the roles and responsibilities of the various actors within a community in a playful way. A volunteer guides the children through six lessons on a journey of exploration. The programme can additionally be integrated into the curriculum and is recommended for pupils in Year 3 and 4.

Pintolino

Primary School

Pupils in Years 4 to 6 work in teams to develop, design and produce their own product or service – from generating ideas to planning and sales activities. They are supported by their teacher and, if desired, by a volunteer.

Personal Economics

Secondary I

Personal Economics introduces the key economic topics relevant for the future. Depending on the needs of the class, the focus may be placed on topics such as the basics of economy, the application process, or managing money.

Youth debate

Secondary I & II

Pupils learn to research current topics independently, consider different perspectives, weigh up the arguments for and against, and form their own opinions. Through a structured methodical approach, they develop the skills to conduct articulate debates on controversial issues, competently defend the position assigned to them, and respect differing viewpoints.

Company Programme

Secondary II

Over the course of a year, students establish and run a real company, learning what it means to be an entrepreneur. This gives students a unique opportunity to gain practical experience in entrepreneurship.

Economics Olympiad

Secondary II

The Economics Olympiad is part of the Science Olympiad. Switzerland's brightest economic minds have the chance to represent the country at the International Economics Olympiad (IEO), where they are tested in the areas of financial literacy, business administration, and economics.

Our Community

Highlights 2024/25

How does a community work, who is responsible for keeping things in order, and where does the money come from? During the past school year, 587 pupils from 30 classes explored these questions in Our Community. Accompanied by 22 volunteers, the children learned how their community is organised, who looks after safety and services, where the money comes from, what kinds of jobs exist, and how democracy works on a small scale

Schools that support children with a migration background or from socially disadvantaged families also benefited from the programme.

New this year were activities carried out in the cantons of Basel-Land, Schwyz and Valais. In addition, a new partnership with the Options for Growth Foundation in the canton of Lucerne was established to strengthen and expand the programme in that region.

Although there were slightly fewer participating classes than in the previous year, even before the summer outreach had properly begun, 20 classes had already registered their interest for the coming school year.

"The content, and especially the playful way in which it was conveyed, ensured that the children took part with enthusiasm. They always looked forward to the lessons."

Peter Andenmatten, Teacher

Pintolino

Highlights 2024/25

That primary school children are full of ideas and can learn entrepreneurial thinking at an early age was once again demonstrated this year by the pupils taking part in the Pintolino programme.

A total of 367 children, supported by volunteers, planned, designed and sold their own products and services. The Pintolino-Week format is becoming increasingly popular too: demand for it this year was twice as high as in the previous year. Eight classes seized the opportunity to experience entrepreneurship first-hand during a dedicated project week.

Just like the children themselves, the programme also continued to develop. In collaboration with a sustainability expert, the theme of sustainability was integrated more deeply into every phase of the programme.

And if you ask the children themselves, the answer is clear: **they like the Pintolino!**

Satisfaction with the programme:

Satisfaction with the final product:

The skill primary school children learned most:

Can imagine implementing an idea or becoming an entrepreneur:

Personal Economics

Highlights 2024/25

This year once again highlighted just how important practical preparation is for starting out in the world of work. A total of 5,903 pupils benefited from 276 volunteer assignments, gaining hands-on knowledge about our economy, tips and honest feedback on their job applications, as well as guidance on managing their personal finances. This was made possible by 168 dedicated volunteers from the professional world, who brought their experience and expertise directly into classrooms.

"I was able to take part in a job interview for the first time and received positive feedback along with constructive criticism – something I can use for the future."

Participant in the programme, Sissach School (BL)

A particular highlight were the assignments at the École de l'Accueil in Lausanne, where around 350 young people from disadvantaged backgrounds received support in preparing for their professional and personal futures. For the first time, a regular assignment also took place at a school in Ticino, following the first extracurricular activities introduced there the previous year. In addition, a collaboration with the IdéeSport Foundation was launched in Ticino, with plans to extend it to the whole of Switzerland in order to reach even more young people.

Winning the project competition of the organisation Check Your Chance, along with the associated prize money of CHF 50,000, has made it possible to implement a valuable idea: pupils across Switzerland are to be supported even more effectively in their application process – beyond Personal Economics. In the future, they will be able to book an online appointment with a volunteer professional to have their application documents reviewed or to practise a job interview. Together with gateway.one, work is currently underway to bring this new service to life.

In parallel, a project in cooperation with the University of Zurich is exploring how to use AI in the application process. An accompanying study is examining the difference that targeted use of AI can make – not as a replacement for the young people's own thinking, but as a tool to deepen their reflection and provide fresh inspiration.

YES is also delighted that corporate volunteering has recently attracted increasing interest from companies: among the new partners welcomed this year are Mobiliar, Ernst & Young, Johnson & Johnson and ZKB.

Youth debate

Highlights 2024/25

With an open mind, respect, and clear communication, the participants of Youth debate once again showed us that good debates do more than persuade – they bring people together, spark reflection, and encourage critical thinking. At the in-school qualifications in October alone, around 7,600 pupils from lower and upper secondary schools gained their first experience in structured argumentation. They learned to express their opinions clearly, present persuasively, and explore socially relevant topics from multiple perspectives.

A total of 340 young people advanced to the twelve Regional Finals, held across nine regions. The largest Regional Final took place in Central Switzerland, with over 50 debaters. Venues such as the SQUARE at the University of St. Gallen, the University of Applied Sciences Northwestern Switzerland, and the Cantonal Parliament in Jura provided excellent stages for the participants to showcase their debating skills.

"Debating is very much an individual sport, and I had to compete against everyone. Yet the sense of camaraderie was there – you could debate, share arguments, get feedback, and even play Uno together."

Niklas Ebner, Youth debate finalist, in an interview with Limmatwelle

For the regional winners, the journey did not end there: in the finalist training sessions in Lucerne and Montreux, they continued to refine and polish their arguments. With sharper reasoning and renewed energy, they went on to compete at the National Final in Berne.

The programme also made important progress beyond the stage. It is attracting growing interest, particularly in vocational schools. In November, for the second time, an inter-company course was held for commercial apprentices in the federal administration. Participants explored debating culture in a workshop, prepared independently through e-learning, and demonstrated their skills in a practical assessment. The pilot project was so successful that it will become an official part of the commercial apprenticeship programme in the federal administration next year.

In May, the first introductory courses were also held at the Commercial Training Centre in Zug.

The network of participating schools has also grown. New additions this academic year included the Evangelische Mittelschule Schiers in Graubünden and the Division Commerciale du CEJEF in Jura. A particular highlight was the new partnership with the Wegweiser Foundation, which now supports Youth debate as a National Partner.

Nationales Finale

The programme year reached its climax with the National Final on 4 and 5 April in Berne. After impressing in the first preliminary round with compelling arguments and confident delivery, Switzerland's best 60 debaters were treated to a very special highlight: a visit to the Federal Palace. There, they posed their most pressing questions to National Council President Maja Riniker, Federal Councillor Beat Jans, and other members of the National Council, and discussed a wide range of topics with them over a subsequent reception.

"The future is in your hands, you are the democracy, you are the future. That gives me hope!"

Federal Councillor Beat Jans

After a short break, the second preliminary round took place the following day. Once again, the young participants demonstrated how thoughtfully and carefully they could weigh opposing arguments. In the afternoon final debate, Switzerland's top debaters discussed whether federal judges should in future be elected independently of political parties. The final was marked by tension, emotion, and powerful words, until the best debaters from both secondary school levels and all linguistic regions were crowned. In addition, the Wegweiser Ethics Award was presented to three debaters who, in a three-minute video, convincingly presented and reflected on their personal values in relation to a debate topic.

Company Programme

Highlights 2024/25

This year saw a record number of pupils take part in the Company Programme - from 58 schools in total.

1494

268 * mini-enterprises from

From August onwards, they set up their own mini-enterprises in teams - 190 in the Competition module and 78 in the Fundamentals module. In both formats, the students developed their first business ideas and worked together to put them into practice.

Their entrepreneurial journey began with the Entrepreneurial Basics Workshop. The teams then wrote business plans, carried out market analyses, and prepared for the production and sale of their products. In January and February, they presented their business ideas at eight pitch competitions, impressing with their skills. The mini-enterprises also proved successful in financial terms: the Top 25 generated a turnover of more than CHF 136,472 and a profit of around CHF 48,724 during the year.

The programme year culminated in the National Final at Zurich's main station. There, the Top 25 teams competed in front of a panel of experts for a place on the podium and a range of awards – all while thousands of curious passers-by looked on. There was a particular sense of wonder when the light and sound of the advert by PLANET PASTA, the winning team of the YES Media Award, filled the station concourse. The award was realised for the first time in cooperation with Shining Films, Weischer. Cinema and the Zurich University of the Arts (ZHdK), where young talents produced the cinema spot.

The Fundamentals module, following a successful pilot phase, has now been officially introduced. It allows for flexible, noncompetitive participation in the Company Programme. Around one-fifth of the learners took part in this format.

"For our commercial apprentices, Fundamentals is like the practice head for hairdressing trainees: it gives them the opportunity to apply and deepen the theory they have learned by working on a practical example."

Patrick Scheiblechner. Handelsschule KV Basel

The content and platforms were further developed accordingly: the Coaching Stand Design was hybridised, and the sustainability module - created in collaboration with myclimate - was successfully delivered in digital form. In addition, a project with Accenture is developing a Deep Dive on artificial intelligence (AI). This will give participants an in-depth insight into the applications of Al in business management. The module will be implemented in the Company Programme for the first time in the coming school year.

National Final and awarded mini-enterprises

At the National Final, the Top 25 mini-enterprises once again demonstrated what they were capable of. For two days at Zurich's main railway station, they sold their products and impressed both the jury and countless passers-by with their pitches and sales strategies. They were competing for the title "Company of the Year 2025" as well as many other awards.

Company of the Year 2025: KIWOKO, Alte Kantonsschule Aarau

2nd Place: KonfiGnuss, Kollegium Spiritus Sanctus Brig

3rd Place: ShamPure, Kollegium Spiritus Sanctus Brig

Best Presentation Award: UpDenim, Scuola Cantonale di Commercio

Best Brand Award: ShamPure, Kollegium Spiritus Sanctus Brig

Best Vocational Education Team Award: UpDenim, Scuola Cantonale di Commercio

Accenture x YES Alumni Moonshot Award: KIWOKO, Alte Kantonsschule Aarau

Coop Sustainability Award: necessity+, Stiftsschule Einsiedeln

IGE IP Management Award: KIWOKO, Alte Kantonsschule Aarau

YES Media Award: PLANET PASTA, Gymnasium Biel-Seeland

Swiss Prime Site Best Marketing & Sales Award: KIWOKO, Alte Kantonsschule Aarau

UBS Innovation Award: necessity+, Stiftsschule Einsiedeln

The Entrepreneurial School Award: Kantonsschule Alpenquai Luzern

With their cookbook "Mit Flo um die Welt", designed to encourage children to spend less time on screens and unite generations, KIWOKO earned the title Company of the Year and the opportunity to represent Switzerland at the European Final, Gen-E, in Athens. In Greece, the young entrepreneurs gave it their all once more: over three days they conducted interviews with experts, sold their children's cookbook, and pitched their company – all in a foreign language. A particularly proud moment came when CEO Mathéo Page was honoured by our umbrella organisation, JA Europe, with the Alumni Leadership Award.

Economics Olympiad

Highlights 2024/25

Whether in the online exam, the business case, or later on the international stage, the Economics Olympiad once again demonstrated the immense potential of young minds. A total of 370 pupils from 64 schools tested their knowledge of economics and business studies in the online exam. For the first time, a new online testing platform developed by the association was used. To provide more targeted support to participants in the future, a new second round was also developed this year, which will be introduced in the next programme year.

To be fully prepared for the National Final, the finalists attended the Innovation Camp at the Swiss Youth Hostel in Solothurn. There, they deepened their knowledge, received individual feedback, worked together on economic challenges, and got to know one another better.

This year, the National Final was held at the headquarters of the Economics Olympiad's new partner – Raiffeisen – in St. Gallen. The young participants sat a written exam and then presented their solutions to a practical business case for the Swiss Youth Hostels. Innovative ideas were sought on how the company could make its offerings attractive to Generation Z. After an intense final, the winners were announced: Elihu Bao, Zaina Rahman, Alisher Ruziev, Maximilian Thiersch and Myles Willeke distinguished themselves among the finalists and won the competition. For the first time, two participants from the French-speaking Switzerland were also part of the Swiss delegation. Together, they travelled to Azerbaijan to compete in the 8th International Economics Olympiad (IEO).

At the IEO, they faced not only international competition but also a varied cultural programme. In Baku, the Swiss delegation competed with young people from over 60 nations in exams covering Economics, Finance, and a 24-hour business case. Despite technical challenges at the start of the competition, the team demonstrated impressive cohesion, which later paid off. Alongside the competition, the cultural programme was not neglected: the participants visited the Swiss Consulate in Baku, the Heydar Aliyev Center, and the burning natural gas site Yanar Dag. This international adventure left more than just memories: four of our champions were recognised for their achievements in Baku.

YES Alumni

Highlights 2024/25

Former participants of Youth debate and the Company Programme support YES programmes on a voluntary basis and meet regularly to maintain both their network and friendships.

Volunteering-hours

Reunion Weekends

Company Programme

Another successful year full of commitment, networking, and exciting events has come to a close for the YES Alumni of the Company Programme. This calendar year, they have even more reason to celebrate – 20 years of YES Alumni from the Company Programme.

The programme year began, as tradition dictates, with the highlight of all events: the Reunion Weekend. Forty-two YES Alumni travelled to Budapest together for a sociable weekend. The trip combined a scavenger hunt – connecting new and older participants – with sightseeing and networking opportunities. In winter, YES Alumni organised another joint weekend. The annual Snow Weekend with participants from the DACH region took place once again in Switzerland, in the canton of Graubünden. In perfect sunshine, the YES Alumni took to the slopes of Lenzerheide. Beyond these larger events, there were also smaller gatherings, such as a group visit to a Christmas market and two different shared flat (WG) crawls.

A The Company Programme alumni were not only active participants in these events but also demonstrated their commitment to volunteering. Their numerous volunteering hours ensured a smooth-running programme year. This year, a proud total of 869 volunteering hours was recorded.

At the National Final, the highlight of the Company Programme, YES Alumni were also present. To recruit new alumni, they organised a small event to provide insight into the network, successfully gaining 74 new members. Now, everyone is looking forward to the new programme year and eagerly anticipating further celebrations of the 20th anniversary in this calendar year.

The YES Alumni Company Programme is supported by: accenture

Youth debate

Between croissants in Paris, research in Zurich, and debates in Bern, the past year for the Youth debate Alumni was marked by connection, media literacy, and, of course, a love of debating.

The year began, as tradition dictates, with the Reunion Weekend, which took the alumni to Paris, including a visit to the Swiss Embassy.

A few months later, the alumni visited the headquarters of the Neue Zürcher Zeitung (NZZ) in Zurich. Carola Ententeich, Deputy Editor-in-Chief of the NZZ, guided them through the building. From the terrace, the alumni enjoyed views over Bellevueplatz and explored the NZZ podcast studios. They also had the opportunity to ask questions and discuss the role of the NZZ as Switzerland's oldest existing newspaper.

In March, a group of alumni returned to the NZZ, this time for an engaging workshop with Open-Source Intelligence (OSINT) journalist Jessica Eberhart and OSINT team leader Jan Ludwig. The alumni learned how to gain insights into conflict zones using maps and how to identify so-called deepfake videos.

Alumni were also present at the National Final of Youth debate in early April: four former programme winners showcased their skills in a demonstration debate, providing inspiration for this year's finalists and plenty of entertainment.

Towards the end of the year, French-speaking alumni received a special opportunity: at RTS in Geneva, they participated in an Infrarouge broadcast on the topic "Second World War: Is Memory Fading?", along with an exclusive studio tour.

A major success this year was the strong voluntary engagement and growth of the network: 36 new alumni joined the programme.

YES, We Do More!

Sustainability Innovation Challenge

Following the success of its first year, the Sustainability Innovation Challenge, conducted in collaboration with Accenture, entered its second round.

On Saturday, 7 September, around 70 motivated young participants met at 8:00 a.m. at Accenture's Zurich office to tackle the challenge: "Create a product or service that uses artificial intelligence to achieve one of the Sustainable Development Goals (SDGs)." Working in teams, participants developed various solutions. They were inspired by inputs from Michael Blickenstorfer and Kordian Caplazi (Rimon Technologies) as well as Fidel Esquivel (UpCircle), who sparked their creativity.

In just four hours, each team had to refine their idea, turn it into a concrete concept, and present it to the jury. The winning idea proposed using Al-assisted rainwater planning to solve urban flooding and wastewater infrastructure problems in developing countries. The team won a prize of CHF 2,000 and six months of support from Accenture to implement this or other ideas.

Women in Finance Initiative

As part of the Women in Finance Initiative by JA Europe and Bloomberg, two Swiss women were once again able to travel to Brussels this year. The initiative aims to foster greater diversity in the finance sector by providing space for personal exchange between female leaders and talented women with an interest in business

«We got into conversations with women from different backgrounds and with diverse career paths, who gave us a great insight into the finance world and its infinite possibilities. I cannot wait to see what we will achieve in the future.»

Margot Kindbeiter, YES Alumna

In Brussels, the participants gained insights into companies and institutions such as Bloomberg, the banks Degroof and JP Morgan Chase, the European Parliament, and the Swiss Finance Council (SFC). Highlights of the trip included inspiring discussions with Irene Tinagli (Member of the Progressive Alliance of Socialists and Democrats in the European Parliament) and Annemie Rombouts (Deputy Chair of the Belgian Financial Services and Markets Authority, FSMA), as well as a joint dinner with inspiring professionals from around the world.

Leaders in Exchange

Highlights 2024/25

"Leadership is not about fixed ideas, but about the ideas you receive, which change over time. Leaders in Exchange offers an ideal platform to meet new people with different perspectives – and there is so much to learn from that."

Christian Burkhardt, former participant of Leaders in Exchange

Leaders in Exchange provides experienced leaders from the education and business sector with the opportunity to exchange ideas on various leadership topics and support each other in their professional development. Based on strengths, experiences, and interests, tandems were formed in advance, and at the kick-off event in November, the 14 participants were able to get to know one another. Over the following eight months, they maintained close collaboration and exchange.

This year, Leaders in Exchange focused on communication and its importance for effective leadership. Various inputs and discussion opportunities made for eight months full of new insights and collaboration. The programme concluded with a final event at Swiss Prime Site in the Prime Tower. Under the guiding question, "What does good leadership communication mean?", participants had the chance to reflect on their experiences and exchange ideas one last time.

Mutual encounters at eye level, the high flexibility of the programme, and the personal commitment of the participants contribute to its success. Leaders in Exchange also provides space for reflection on both sides by combining tandem mentoring with knowledge sharing. By encouraging a shift in perspective, the programme generates visions for future-oriented leadership in a rapidly changing society and work environment. The new approaches developed benefit both schools and businesses.

The tandem learning concept is offered in collaboration with economiesuisse and the Association of School Principals of Zurich

JA Worldwide

Impact on the whole world

Junior Achievement Worldwide, with over 100 member countries, forms a global network of entrepreneurial-minded individuals and is the largest organisation in the world dedicated to preparing young people for the workforce and entrepreneurship. In the ranking by the dotgood (formerly NGO Advisor), JA Worldwide is placed fifth among the ten most influential organisations for social well-being worldwide.

In recognition of its commitment to economic empowerment, prosperity, and peace, JA was nominated for the **Nobel Peace Prize** for the first time in **2022** – an achievement it has **continued to earn annually** since then.

JA Worldwide has been active globally for over 100 years – even in regions affected by political instability, violence, war, unemployment, poverty, and hopelessness. Through Junior Achievement, young people are equipped with the mindset and skills needed to build thriving societies. The numbers of participating pupils, teachers, and volunteers illustrate the significant impact of JA Worldwide in the field of entrepreneurial education and highlight the relevance of its mission.

Over **100** countries participate in JA Worldwide programmes each year.

More than **430,000** volunteers contributed by sharing practical knowledge and their personal experiences with pupils.

Over **300,000** teachers enabled their pupils to take part in a JA programme last year.

Last year, JA Worldwide reached 19,945,000 students.

Your Engagement

Say Yes to YES

...as a member

As a member of YES, you support the programmes with an annual contribution and enable their further development. Membership fees are CHF 50 for individuals, CHF 100 for primary and secondary schools, CHF 500 for industry and educational associations, SMEs, and upper-secondary schools, and CHF 3,500 per year for large companies.

...as a volunteer

YES offers three supervised volunteering programmes across different school levels. Volunteers take on the role of a teacher for a few lessons, for example, preparing young people for their first job interview or introducing primary school pupils to the functions of a local community. Both individuals and companies can engage as volunteers. Companies, in particular, have the opportunity to contribute, together with YES, to practical economic education in Switzerland.

...with a donation

Help promote entrepreneurial thinking and contribute to the personal development of young people. Ensure that future generations benefit from high-quality economic education by supporting YES with a donation. You can decide the amount yourself.

Invest in the education of the next generation and thereby help provide practical economic and civic education – conveniently via Twint.
