

# Precautionary Measures for YES Events

## Overall Situation

The Federal Council and the cantons will continue to regulate the necessary measures in the wake of the existing, extraordinary epidemic situation in Switzerland. The schools and partner companies of YES have drawn up their own precautionary measures. Various protection measures are being implemented for schools within the cantons.

Whatever the epidemiological situation, YES puts the health of students, teachers, volunteers and employees first. We are monitoring further developments and will adapt our measures, if necessary, even at short notice depending on developments and the situation.

## Overview of the main measures

- The [Covid certificate obligation](#) applies to all participants of events organized by YES aged 16 and older. Due to the certificate obligation, it is not compulsory to wear a mask
- Compliance with the local measures of schools and partner companies after consultation with teachers or those responsible for the venue
- Compliance with all hygiene measures such as washing hands, disinfecting/cleaning work surfaces and regular ventilation of rooms
- Contact tracing: recording and management of the most important contact details (name, home address, e-mail address, mobile phone number) of all participants on site, if these cannot be recorded in advance
- Furthermore, the currently valid measures of the [campaign of the Federal Office of Public Health \(FOPH\)](#) apply.

## Special measures for the National Finals

- The Covid certificate obligation also applies at the National Final. In addition, contact details must be collected. For such major events, separate precautionary measures will be drawn up based on the current situation.
